Analysis of Q3 Results

Q3 EPS of \$.04 missed our estimate of \$.06 due to lower than expected sales (\$.01) and foreign exchange losses (\$.01). Sales in Q3 declined 12.5% YOY to \$33.6 million vs. our estimate of \$37.5 million. The company had previously expected Q3 sales to increase sequentially from Q2 sales of \$36.6 million. EDG sales declined 9.4% YOY primarily due to continued uncertainty in Asia and Europe. Weaker end user verticals included textile manufacturing and wood treatment industries while the satellite communications vertical was strong stemming from the Powerlink acquisition. EDG did record its highest monthly sales total in North America in the past two years this past February. The CO2 laser market continues to be a strong vertical buoyed by expanding customer acquisitions and prolific accessories growth. Canvys sales declined 18.9% YOY due to softness in the healthcare vertical specifically PACS (picture archiving and communication systems) and weakness in Europe. Healthcare customers continue to face regulatory challenges e.g. medical device excise tax. Despite greater than expected topline pressure the company succeeded at margin preservation and working capital management. Gross margin improved 30 basis points sequentially to 29.5% as labor and overhead under-absorption were effectively combatted. The company reduced headcount and working hours in its manufacturing division. SG&A as a percentage of sales ticked down twenty basis points sequentially to 29.7%. Operating cash flow was \$2 million for the quarter due to improved AR and Inventory management. Operating cash flow is nearly \$5 million over the past 9 months. The company did not repurchase any stock in the quarter but still has approximately \$30 million of stock repurchases authorized. The balance sheet remains strong with \$140.6 million (\$9.25/share) in cash and short-term investments with \$0 debt. The company continues to evaluate acquisition opportunities including large ones with a focus on the diagnostic imaging healthcare market. The company believes that it can effectively compete in this market with high quality, lower priced products and by leveraging its global infrastructure.

Outlook

The company is seeing some signs of stability in the global marketplace and is guiding for Q4 revenue of \$36-\$38 million which represents midpoint sequential quarterly growth of 10%. Additionally, the company expects its FY13 tax rate to be below 10%. The company remains committed to achieving its operating margin goal of 5%. While the company's end markets remain clouded with uncertainty, we're encouraged by the strength in some of the niche verticals of EDG and its strong February should bode well for performance in FY14. We expect EDG to grow modestly in FY14 with more uncertainty inherent in Canvys. We expect the company's effective working capital management and cost restructuring to continue resulting in improved operating margin in FY14 with positive free cash flow. Foreign currency exposure remains a risk factor. Sizeable accretive acquisitions represent upside and may significantly complement the company's pared down operating structure. The stock presently trades below book value.
