### Analysis of Q4 Results

Q4 EPS of \$.01 (excluding one-time charges) was lower than our estimate of \$.04 due to a foreign currency loss of (\$.07). Operating income of \$3.4 million, excluding one-time charges, exceeded our estimate of \$2.2 million as cost-cutting and efficiency measures continue to prove effective. The company's current headcount stands at 775 vs. 926 in the prior year. Sales declined 26% YOY for Q4 vs. our estimate of a 20% decline. The Electron Device and Canvys groups have proven more sensitive to the macro economy. EDG and Canvys sales declined 36% and 46% respectively. The company is scaling back manufacturing for EDG and wrote off \$7.5 million in inventory. The RFPD division continues to weather the macro climate. While sales declined 5.6% for FY09, the overall industry declined between 20-30%. Growth continued in the infrastructure segment of RFPD due to the TD-SCDMA build-out in China. Sales in Asia/Pacific grew 8.3% YOY for FY09 and now comprise 37% of total sales. The balance sheet strengthened over the quarter as cash improved \$11.3 million sequentially to \$43.9 million (\$2.45/share). The company also announced a dividend of \$.02/share and the stock repurchase program remains in effect with no expiration date.

### Outlook

The company expects topline challenges to continue in the short-term, forecasting a 20% sales decline for Q1 of FY10. The company continues to target near-term gross margin of 24.5%. Operating expenses for FY10 are projected to be near \$97 million. The company maintains that numerous opportunities for cost savings and efficiency improvements remain. Income taxes, cap ex, and D&A are projected to be \$2 million, \$2 million, and \$4 million respectively for FY10. The company expects to generate positive operating cash flow in FY10. The RFPD division is projected to record YOY sales declines of 6-9% in the first half of FY10 with modest growth expected in the second half. Please note that financial performance in Q1 of the prior year was still relatively strong so Year over Year comps for Q1FY10 may obscure sequential performance. The company's operating cost structure is now more tightly coiled and offers significant leverage opportunities when the macro economy improves. Additionally, the Asian electronics market offers growth potential. A recent survey of Chinese electronics distributors found that 89% of these distributors project average revenue growth of 13%<sup>1</sup> for 2009. The same survey also acknowledged Richardson as one of 10 companies to be cited as a "Most Preferred Overseas Franchised Distributor" for China. Applying the aforementioned operating assumptions for FY10, we arrive at an EPS estimate of \$.40 for FY10. The stock trades at a discount to its peers based on multiple valuation metrics.
